**HEALTHCARE  
INTERIOR SOLUTIONS**

*Enhancing the Environment in Which People  
Live, Learn, Heal, Work and Play.*

## DESIGNED FOR HEALTHCARE

PSI's Healthcare products include custom casework, millwork, wall panel systems and headwall solutions. Each is designed to fit the evolving and growing demands of the healthcare industry. Design flexibility combined with durability and easy maintenance make PSI's Healthcare solutions a smart, cost efficient choice for facility designers and building management professionals.

For more than 10 years, PSI has earned a stellar reputation in the healthcare industry. From smaller regional hospitals to the 900+ bed New Parkland Hospital in Dallas, PSI consistently delivers the products and installation expertise healthcare organizations of every size require. PSI's project management team works closely with our customers to provide seamless integration with other building trades throughout the process so projects run efficiently, reducing the risks of costly delays.

## CUSTOM BY DESIGN

Healthcare organizations bring their interior design visions to life, utilizing PSI's range of healthcare appropriate solutions.

Our healthcare solutions include:

- Custom Casework and Laminated or Solid Surface Countertops
- Architectural Millwork
- Wall Panel Systems
- Patient Headwall and Footwall Solutions

PSI's Healthcare Solutions offer an extensive range of high quality materials and finish options. Manufactured in our Temple, Texas factory with utmost care and quality control, our superior products are the result of substantial engineering and manufacturing experience. This insures a finished installation that is safe, meets your design aesthetic, is easy to maintain and will perform for many years to come.

### Strength & Scope

Today's hospital development projects demand financial strength and the ability to scale solutions – PSI has both. With over 340,000 square feet of manufacturing and warehouse space and more than 150 employees, we have the resources to handle multiple large projects concurrently.

### Compliance Matters

The PSI team is experienced with projects requiring industry compliant products and construction methods including environmentally friendly and socially responsible materials or products that contain bacteria resistant materials.

**PSI's Custom Casework and Millwork** are built to your specifications. Our cabinets, nurses' stations and work surfaces are constructed to your design to meet the needs of the various functional areas in which they are installed. Our Engineering team can also consult with you on design concepts or provide value engineering ideas. PSI has been licensed by AWI (American Woodworking Institute) and is able to manufacture premium grade cabinets which ensures the highest quality standards in both design and function. We are also a licensed fabricator of work surfaces utilizing a copper infused Preventative/Biocidal Surface™ from EOS Surfaces LLC.

**The PSI Wall Panel System** is an engineered, prefinished, modular wall surfacing product that can be used in many areas in healthcare interiors. Our high-pressure laminate or solid phenolic abuse-resistant wall panels work well in corridors or in patient rooms. Dry erase panels can be used in patient rooms, nurses' stations, or conference rooms. Custom printed laminate wall panels provide way-finding or become artwork. These panels will all withstand cleaning with typical healthcare cleaning agents. Wood veneer, metal, and resin laminate faced panels may be used in entrance lobbies or executive areas.

**The PSI Headwall Solution** combines utmost design flexibility with a cost-effective installation method to deliver a good looking, functional, and easily maintained patient headwall. The project design engineer can choose from any manufacturer of med gas outlets and service boxes and specifies their location in the headwall. PSI uses this information to provide a template to the contractor to precisely locate these outlets and service boxes in the wall framing. The services are then connected and drywall applied. The PSI headwall panels are prefabricated with cutouts from the same template information and are installed with our molding system. The molding is designed to allow panel removal to access the in-wall services. PSI panel finishes include high pressure laminate, high abuse resistant phenolic panels, resin, markerboard and wood veneer surfaces.

## PARTNERSHIPS FOUNDED ON INTEGRITY

PSI Healthcare Solutions including casework, wall panel systems and patient headwalls are all designed with compatible components allowing them to work together as an integrated system. Flexible design options make it easy to create a design theme that reinforces the organization's overall creative vision and aesthetic. General Contractors enjoy having a trusted partner who serves as a single point of contact for multiple areas on the jobsite, and pays attention to details to ensure the job is done right and completed on time.

From concept, through manufacturing, to installation, PSI is a true partner on every project. Our experienced engineers, manufacturing team, and project managers are no strangers to the challenges of construction and renovations. We approach every healthcare installation with a clear understanding that our work needs to align with your goal of creating an environment designed to deliver outstanding patient care.

*"A single \$500 change in one room could mean \$450,000 in changes throughout. We needed someone who could tell us, 'I know the architect has this in mind, but doing it this way will be half the cost.' Or, 'this is similar and it will last 10 years longer.'"*

*"PSI was not just a subcontractor; they were partners who helped out in a difficult situation."*

*Matt Jones  
Operations Director  
BARA Joint Venture Team for  
Parkland Memorial Hospital*

### Built to Last

PSI has been manufacturing high-quality caseworks and walls systems since 1990 for our corporate and education clients. PSI launched its dedicated Healthcare Interiors Division a decade ago and since then has been involved in development projects for some of the Texas' most prestigious hospitals.

## OUR CUSTOMER PROMISE

Outstanding customer service is the foundation of PSI. We will work closely with you each step of the way, from initial design consultation through delivery. And our service does not stop there. We follow up after each project to get your feedback, and then use the feedback to enhance the way we do business in the future. We look forward to working with you and delivering on this promise.
