

COMPACT LAMINATE WALL PANELS SYSTEM

PSI
PANEL SPECIALISTS, Inc.

**ABUSE-RESISTANT PANELS
FOR HIGH-TRAFFIC AREAS**

**OPTIMAL FUNCTION
SUSTAINABLE AESTHETICS
AND VALUE**

Beautiful High-Impact Scratch Resistant Surfaces

As design professionals, you want to make sure the products you specify will bring your vision to life and bring long-lasting value for your client. **Providing both beauty and strength, PSI's Compact Laminate (Phenolic) Wall Panels are an ideal choice for environments requiring extra durability, impact resistance and ease of maintenance.** Compatible with PSI's complete line of molding systems and a variety of wall panel types, **Compact**

Laminate (Phenolic) Wall Panels enable you to address specific areas on the wall that require more performance without compromising a design solution that is beautiful to both the eye – and to your budget. Choosing PSI Phenolic Wall Panels affords you the flexibility to create spaces that meet all the practicalities your project needs with the tailored elegance you expect from the leader in commercial wall panel systems.

Made Especially For High Traffic Areas

PSI's Compact Laminate (Phenolic) Wall Panels add strength and stamina to beauty. **In comparison to many other wall finishes, the unique composition of our Phenolic Wall Panels provides superior scratch,**

impact, graffiti, and stain resistance, ease of maintenance and compliance with applicable fire codes. Additionally, the non-porous nature of Compact Laminate (Phenolic) panels minimizes moisture concerns.

PSI'S Phenolic Partners:   

Lamitech's compact laminate offers **Carbon Neutrality** as part of its Big House Sustainability project. **Backed by a Cradle to Grave EPD certifications.**

THE PERFECT COMBINATION OF DURABILITY, ENDURANCE & DESIGN FLEXIBILITY

PSI: The Best Choice For Interior Compact Laminate Wall Panels

PSI offers an unique interior wall panel system that can combine a phenolic panel alongside a variety of panel types for a completely unified design solution. **PSI's phenolic panels in tandem with our variety of premium and standard wall panel options gives you the freedom to provide your client with sensible design solutions**

with the potential for significant costs savings. For example, figure 1 demonstrates how phenolic panels at lower high-impact elevations on the wall are visually no different than the lower cost standard HPL panels that clad the majority of the wall area - **effectively increasing performance while decreasing the overall SF cost.**

- Low cost installation
- Resilient in heavy traffic areas
- Moisture resistant
- Class A or B fire-ratings
- Panels are GREENGUARD certified
- Dependable access to hundreds of high pressure laminate patterns available in Compact Laminate (Phenolic) panels from our reliable partners: Wilsonart, Formica and Lamitech.
- PSI offers installation services with the same standard of excellence and dependability we provide in our manufacturing process.

PSI'S Compact Laminate (Phenolic) Panels Are Ideally Specified For Interiors In:

- Public transportation terminals & waiting areas
- Hospital & clinic corridors
- Stadiums
- Concession areas
- Convention centers
- Restroom walls
- Areas surrounding drinking fountains
