

Clicwall Easy and Quick Installation:

Clicwall is designed with a **click-together mechanism**, allowing it to be easily and quickly installed without the need for any special tools. **This can save both time and money** during the installation process.

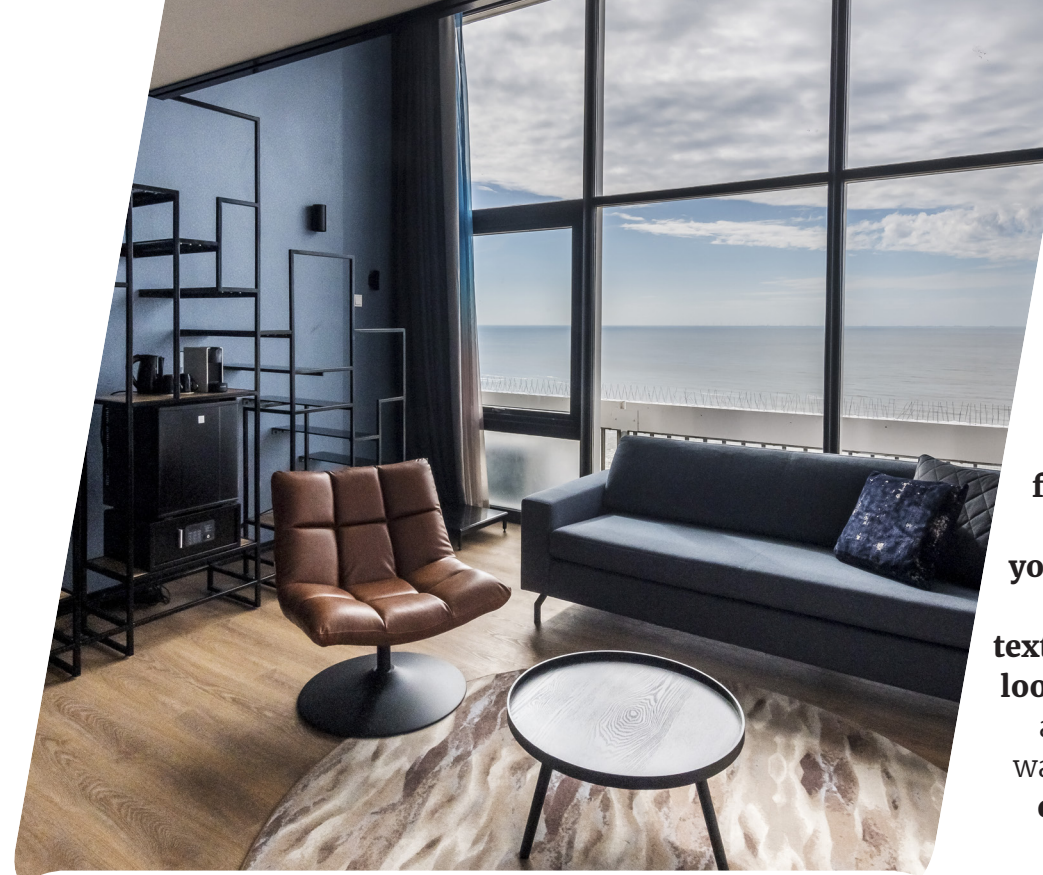

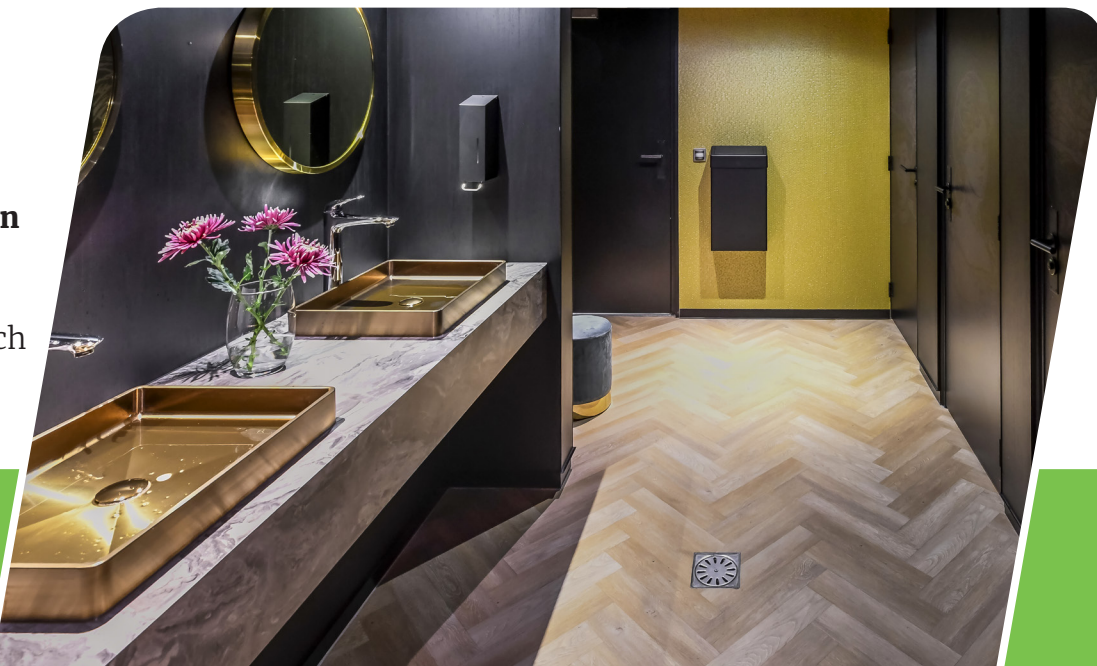

Durable and Long-Lasting

Why use Clicwall? Because it's **made from high quality materials**, Clicwall is very easy to clean and is up to **4 more scratch- and impact resistant than traditional wall coverings**, making it an ideal product for intensively used environments.

Versatile

Clicwall is a perfect for any of your applications. Clicwall is an **ideal option when renovating or expanding homes or commercial projects** such as **hotels, offices, retail and public spaces**.

Over 200 Designs and Finishes

Let your creativity work with the wide range of designs and finishes. **You can choose from warm walnut or soft oak or bright uni-colors to make your project shine.** Next to that, Clicwall is also **available with textile, stone, chalks or concrete look.** Prefer painting or integrate a custom graphic for an accent wall? Then **Clicwall paint or our digital print service will be a good fit for you.**

Environmentally Friendly

Clicwall is made from **100% recovered wood**, and its production process aims to **minimize waste and energy usage.** But the circle does not stop there. Clicwall can also be re-used or recycled after usage.

Fire-retardant

Clicwall has a **fire-retardant version** which can add an **extra layer of safety to the walls of your building.** Basic Clickwall carried class B rating, while fire-rated version has class A.
