

# LED MOLDINGS & BACK LITE WALL PANELS

**PSI**  
PANEL SPECIALISTS, Inc.

**Enhancing the Environment  
in Which People Live,  
Learn, Heal, Work and Play.**

# PSI System 412 with Integrated LED Reveal

## Light that defines the wall.

THE PSI SYSTEM 412 seamlessly integrates LED lighting into the panel reveal, transforming clean architectural lines into bold, illuminated design features. Precision-engineered for flexibility, it delivers striking accent lines and soft ambient glow in one refined system.

Powered by high-performance linear LED technology and a continuous diffuser, it produces a smooth, uniform light with no visible diodes—just pure, even illumination. Install horizontally or vertically while maintaining the sleek, minimalist PSI aesthetic.

## Where It Works

- Lobbies & corporate interiors
- Retail & hospitality environments
- Healthcare & education spaces
- Feature walls, corridors & reception areas

## Key Advantages

- Integrated LED reveal for clean, seamless lighting
- Uniform, glare-free illumination
- Dimmable and control-ready
- Easy maintenance access
- Fully compatible with PSI 412 modular systems

**The Result:** Sharper lines. Deeper dimension. Walls that come to life.

# Walls That Glow

**Not edge lit. True backlit.**

**PSI BACKLIT WALL PANELS** transform architectural surfaces into luminous design features. Using advanced LED light guide technology, they deliver uniform, edge-to-edge illumination with zero hotspots—just a clean, consistent glow across the entire panel. Ultra-thin and precision-engineered, the system integrates seamlessly into PSI wall assemblies, creating continuous illuminated surfaces or modular feature walls. Designed for performance and flexibility, it supports static white, tunable white, and RGB lighting to match any environment.

## Where It Works

- Feature walls & branded environments
- Corporate lobbies & interiors
- Retail & hospitality spaces
- Healthcare & education settings

## Why It Stands Out

- True full-panel backlighting (no visible light sources)
- Smooth, even illumination across any size panel
- Ultra-thin profile for seamless integration
- Custom sizes for limitless design flexibility
- Compatible with 3form and translucent materials
- Energy-efficient, long-life LED system

**The Result:** Brighter spaces. Cleaner lines. Unforgettable impact.
